

eData Internet Explorer 11

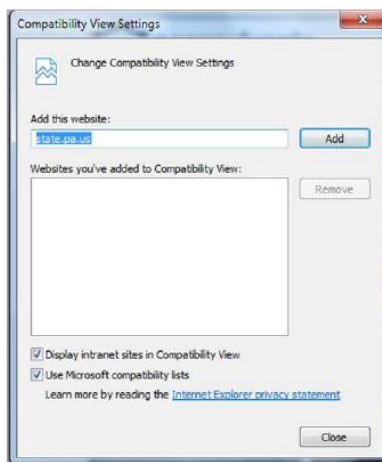

Several e-Data users have reported a problem using the e-Data system with Internet Explorer 11. When trying to open an adult, the “Select” link does not work and will not open the adult screen.

To fix this problem, follow the steps below.

1. Open the PDE website – www.education.state.pa.us
2. On the top right of the screen, click the sprocket icon which will open the Tools menu, as seen in the screenshot below, and select Compatibility View settings.

3. In the Compatibility View settings window, “state.pa.us” should already appear in the “Add this website” text box (see screenshot below). Click the Add button to add the website to the list and click OK to exit the window.

If you continue to experience any problems in the eData system after changing these setting, please contact us at 877-857-8869 or eDataTechSupport@psu.edu.
