OTHER COURSES

Building Learners' Digital Skills Using Instructional Routines

Learn about digital routines and create one for use in class.

Intake and Orientation for Distance Learning

Learn best practices for screening and orienting distance learners, evaluate your agency's current processes, and develop an action plan to address challenges.

Improving Distance Learning Instruction

Implement a new communication strategy for supporting students or for providing feedback, evaluate a distance learning instructional resource for its appropriateness for learners using mobile devices, and develop an action plan for addressing a challenge you face with distance education.

Using a Learning Management System to Support Learners

Put a lesson on an LMS with at least one community-building activity and try it with students or a peer.

Improving Real-Time Remote Instruction

Plan and facilitate a real-time remote instruction session where you will engage students by having them use at least one technology tool during the lesson.

Designing Supplemental Distance Lessons

Learn the essentials of planning a distance learning lesson that will allow students to earn SDL time.
